PROJECT:
JERSEY AIRPORT,
JERSEY

Cityscene Carpet Tiles, Clip-Top fx

Gradus carpet & floor trims

Products & Colours Specified:

- Cityscene carpet tiles, colour: Ice
- Clip-top fx floor trim, colour: Brown
- Trans-edge, interior insert colour: Jet

Application:

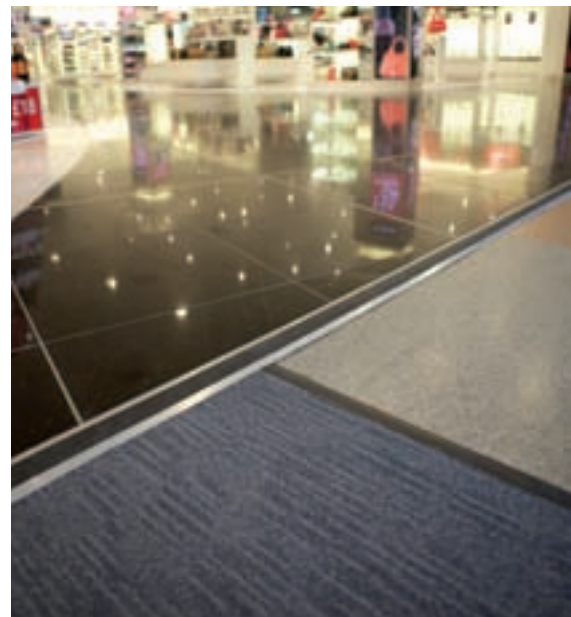

Gradus carpet tiles and floor trims were chosen to be installed into the major redevelopment of the airside departures lounge at Jersey Airport. The products were installed into a large multi-functional environment that includes a Duty Free Outlet, Bar, Restaurant Facilities and Lounge.

The Cityscene carpet tiles were installed into the lounge and bar areas that extend up to the retail space. The attractive, textured loop pile design was installed to create a broadloom effect.

Cityscene carpet tiles are quick and easy to lay and provide travellers with the comfort of carpet.

The Clip-top fx floor trim, suitable for medium to heavy foot and trolley traffic, was installed between the Cityscene carpet and resilient floorings to create a safe transition between the two.

Trans-edge trims which are designed for areas with heavy foot and trolley traffic, perfect for transport and retail environments, were also installed to provide a neat and aesthetically pleasing transition between the different floorcoverings.
