DDA PVC-u Hardnose Stair Edgings

Esplanade Plus Primary Barrier Matting

## Gradus stair edgings and barrier matting

### Products & Colours Specified:

- DDA PVC-u Hardnose Stair Edgings  
Channel & Insert Colour: Glacier
- ADM Aluminium Stair Edgings  
Insert Colour: Glacier
- Esplanade Plus Primary Barrier Matting  
Wiper Colour: Tern

### Application:

Gradus PVC-u Hardnose and aluminium 55mm x 55mm stair edgings were fitted on the staircases of the newly refurbished landmark office building to help improve safety, by reducing the risk of slips, trips and falls. All stair edgings were selected in Glacier (pale grey) to provide a permanent single solid band of colour that would visibly contrast with the dark grey floorcovering, helping to define the step edge.

Esplanade Plus primary barrier matting was also installed in a bespoke circular design for the building's three main entrances. Suitable for use in locations subject to heavy foot and wheeled traffic, the matting was specified with Tern (dark grey) wipers to help disguise dirt and marks, maintain the appearance of the lobby flooring and improve safety by reducing the risk of slip accidents caused by wet floors.
