Macclesfield Library

the history of genus at Macclesfield library

Since opening in 1994, Macclesfield Library has provided the local community with excellent resources and services. The library is located on two floors and offers visitors and library members access to computer facilities, an exhibition area and conference facilities which are regularly used for group meetings and corporate events.

Genus carpet from Gradus was installed throughout the library in 1994 in colours 'Teaberry' and 'Tradewinds'. The carpet still remains in very good condition. The library is very popular with the local community and receives high levels of pedestrian traffic every week. Despite such heavy footfall, the carpet has maintained a fresh appearance and has continued to provide a welcoming and comfortable environment for visitors.

Genus carpet is produced with Marquesa yarn which is inherently resistant to staining and fading. The fibre is extremely easy to clean and maintain and does not require any harmful topical treatments. The unique cleaning benefits of Marquesa help to reduce maintenance costs and improve the lifecycle performance of the carpet. The extended lifecycle performance helps prevent early disposal which reduces unnecessary waste sent to landfill which, as a result, benefits the environment and provides a more sustainable lifecycle plan.

The Genus carpet range is available in a choice of 32 colours in cut pile construction in tile, broadloom and impervious formats. Genus is suitable for a variety of commercial installations.
