# GRADUS

**G**radus was founded in 1966 by Ken Symonds. It has grown from a stair edging and flooring accessories business to a Group with three divisions and over 300 employees, operating in the UK and International markets.

Our vision is to become a leader in Contract Interiors and, although our Accessories business remains the backbone of the Group, we have strong Carpet and Fabrics Divisions offering a portfolio of complementary products and services.

The Gradus culture has been important in developing common links across these businesses. We rely on teamwork to offer the best possible service and quality for our customers.

This common approach to the development of our products and services supports our goal to improve the importance of the Gradus brand for all our clients.

Steve Watt, Managing Director, Gradus Group

# Introduction

# Introduction

Gradus is a leading UK manufacturer of contract interior finishes. Working closely with a wide range of end users and main contractors and in a variety of market sectors, Gradus Contracts offers a supply and installation service on a selection of Gradus products including, barrier matting, wall protection and lighting systems.

## 'Leading Manufacturer of Contract Interiors'

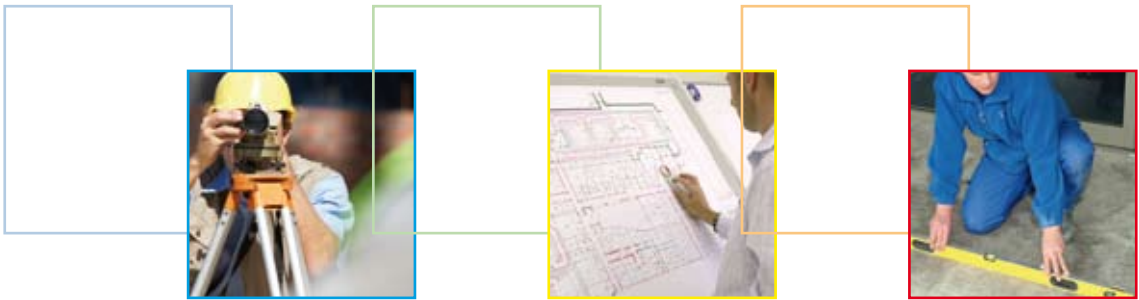

# Specification & Survey

# Specification & Survey

Gradus barrier matting, wall protection and lighting systems are specified for a variety of different reasons including safety, legislation, product performance and aesthetic appearance. Gradus has a team of 20 specification consultants based regionally around the UK who are on hand to help the client specify the right products for the environment.

## 'Safety, Performance & Aesthetics'

# Manufacture

# Manufacture

All Gradus products are manufactured to the highest standards using the best materials available. The products are extensively tested to ensure they meet and exceed the requirements of the applications for which they are intended. The dedicated ISO9002 manufacturing facility offers a flexible and responsive service which together with Gradus logistics ensures products are delivered in the right place, at the right time.

## 'Flexible & responsive manufacturing'

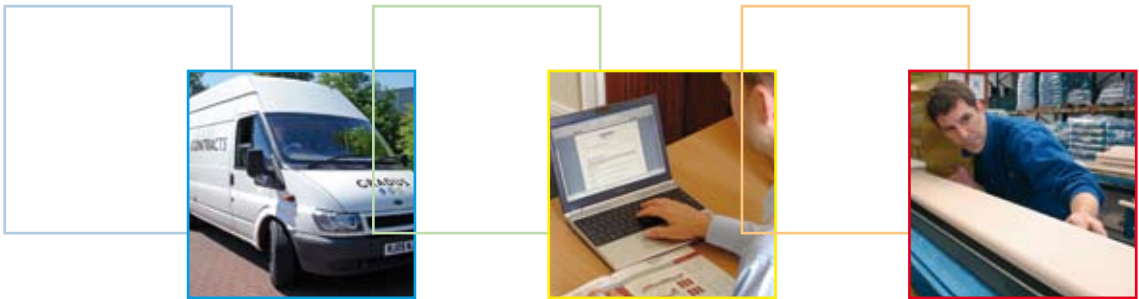

# Project Management

# Project Management

Gradus Contracts provides a professional, expert service to its clients and can value engineer projects to suit individual requirements. The contracts team at Gradus will manage the project in conjunction with Gradus manufacturing and logistics from survey and specification through to installation and hand over, removing risk and saving time for the customer.

# Product Life Cycle

# Product Life Cycle

Gradus manufacture all of their products to the highest quality and to ensure the products remain functional and retain their aesthetic qualities a regular cleaning and maintenance program must be implemented once the products have been installed. To assist with this Gradus are able to offer help and advice tailored specifically to individual projects. Working together with national cleaning partners, Gradus can liaise with the customer to offer a reliable, convenient cleaning package.
